

ARSU PRESCHOOL SCREENING

WHAT IS IT?

The ARSU Universal PreK program will be conducting developmental screenings for children 0-5 years old living in Addison-Rutland Supervisory Union. The preschool screening involves activities that are both fun for young children and help us learn about a child's motor, cognitive, and language skills. Vision and hearing will also be screened.

WHO NEEDS SCREENING?

Any child aged 0-5 years old that resides in Benson, Castleton, Fair Haven, Hubbardton, Orwell, or West Haven who has not previously been screened.

WHERE CAN MY CHILD BE SCREENED?

ARSU is offering screenings at 3 different locations, on several different dates. Choose the best date or site that works with your schedule and give that site a call at the phone number listed for an appointment.

Early Childhood Screening
